Atai Nail
Front End Developer

Projects

"Uber for campus"- Hack-a-thon
10/2023-10/2023

- Contributed as a mentor at HackHers, an all-female and non-binary hackathon, on a project establishing a student-staffed "Uber for campus" service at Georgia State University, addressing financial struggles.
- Assisted in designing and coding the front end and user interface, overcoming complex challenges related to real-time location tracking, secure payments, and privacy concerns.

08/2023-09/2023

Delta Airlines Landing Page Clone

- Created a pixel-perfect replica of Delta Airlines' landing page using HTML, CSS, and JavaScript.
- Implemented responsive design for seamless viewing on various devices.

Google Landing Page Clone
07/2023-08/2023

- Developed a fully functional clone of Google's landing page using HTML, CSS and JavaScript.
- Focused on replicating Google's minimalist design and search functionality.

Weather App
06/2023-07/2023

- Utilized external APIs to fetch real-time weather data and display it to users.
- Designed an intuitive user interface with location-based weather forecasts using HTML, CSS, and JavaScript.

Small Game
01/2022-05/2022

- Collaborated with fellow classmates to create a small game using only HTML, Javascript and CSS.
- Used Git to version control. Debugged with and without partners to ensure smooth gameplay (UX) and create an enjoyable experience

Work Experience
